## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: applicant recites a vehicle for transporting bulk material comprised of wheelsets, side walls and end walls. The side walls are constructed with an integral ridge running the length of the interior of the side walls and projecting towards the interior of the vehicle. The integral ridge is formed of a top section, which is angled downward toward the floor of the vehicle in the direction the material will flow when emptied from the vehicle, and a bottom portion, which is angled upward towards the opening at the top of the vehicle. The ridge is also constructed to be thicker than the side wall as the ridge extends inward.

The prior art made of reference, taken singularly or in combination, does not adequately disclose the features recited in the instant claims. Specifically the prior art references of Tomaka (US 4,800,820) and Alcorn (US 5,154,302) both disclose vehicle bodies with interior facing ridges. However, the ridges on these side walls are not integrally formed with the side wall. Instead they are installed after the walls of the bodies are constructed. The prior art references of Dubois et al (US 4,982,867) and Probst (US 5,738,395) both disclose containers having integral ridges on the interior of the container. However, the references only show portable containers and do not show vehicles with the features recited in the instant claims.

The features recited in the independent claims, in combination with the following dependent claims, are found to be in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
